中國廣東省陽江市陽東大令工業區 Add: Huan Shan Xi RD. Daling industrial

Developing Area, Yangdong, Yangjiang, China.

R.C:529931

History Of Development 公司發展史

Brief Introduction 關于我們

陽江市餠幹設備總廠有限公司創建于70年代末,是國內資歷最早的以生產"百得""旺通"餠幹設備為主的廣東省民營科技企業。整套設備以英國"貝克"、意大利"英瑪福尼"餠幹生產綫的先進技術為基礎,"百得"牌餠幹設備在市場投放後的成功運作,結束了中國餠幹設備依賴進□的歷史,孕育了大批優秀的餠幹生產廠家,推動了國內食品工業的發展。

90年代末,公司投巨資擴建廠房,更新設備,引進國外先進的數據機械加工設備及檢測儀器一批;建立由20多名機械工程師與制餅工藝師組成的食品機械研究所。2000年,為進一步開發新設備、研究新工藝,同時為滿足客戶培訓技術人員的需要,成立了廣東旺通食品有限公司,生產"旺通"牌系列餅幹,并獲廣東省名牌產品和省著名商標。

公司現按IS09001國際質量管理體系運作,嚴格控制采購、生產、檢驗的每個環節,力求產品精益求精,同時擴大了售前售後服務隊伍,公司常派優秀技術員駐全國各地隨時爲客戶進行設備維護、傳授工藝等服務。

相信我們的產品,我們的服務一定能滿足客戶的需要!

Yangjiang Biscuit Equipment Factory Co. Ltd. was established at the end of 1970's, which is the earliest private technological enterprise in Guangdong, china. Mainly engaged in production of "Baide" brand biscuit equipments. Whole set of equipments are basing on advanced technologies of such biscuit production lines as Beck of Britain and Yingmafuni of Italy. It ended Chinese history of dependence on imported biscuit equipments, fostered a large number of excellent biscuit production factories, greatly promoting the development of domestic foodstuff industry.

At the end of 1990's,Our Company invested large sum of capital to expand workshop, update equipment, and introduced into a variety of advanced digital processing equipment and testing instruments from other countries. It established Foodstuff Machinery Research institute with staff of over 20 mechanic engineers and bakery technicians. In 2000, it set up Guangdong Wanttone Food Co. Ltd., for production of Wanttone brand series biscuits, focused on new equipment development and new technology research to provide service for technician training. Now wanttone brand is the Guangdong famous brand and trademark.

Our Company has been operating in compliance with ISO 9001 International Quality Management System, and has strict control over each process of material, production and inspection. It is striving for excellent products and has enlarged the team for Before—sale and after—sale service. Our Company keep assigning high—quality technicians to provide customers with equipment maintenance and operation instructions.

It is believed that our products and services will undoubtedly meet the needs of customers!

二十世紀七十年代, 中國生產餅幹完全靠引進歐州餅幹生產綫。

In 1970'S, Chinese biscuit production line were all imported from Euro.

1981年,成立了陽江縣餅幹設備廠, 開始制造餅幹設備。

In 1981's, Yangjiang biscuit equipment factory was established and started to produce Biscuit machines.

董事長:馮健先生

1978年,董事長馮健先生在其父親的授意下進入陽江縣國營食品廠,拜師學藝,從事餅干生產與機械維修。多年工作和學習,馮先生掌握了各種餅干生產工藝和餅干生產綫的機械原理,還經常幫助兄弟廠家進行餅干生產綫的維修和改造,積纍了豐富的經驗。

八十年代,中國適逢開放改革,公司抓住時機,重點加大廣東、福建兩省的銷售力度,以絕對的優勢占領了大部分市場,使兩省確立了當時餅干生產大省的地位。

九十年代,公司非常重視餅干工藝與設備配套的關鍵點問題,與同行和用户廣泛溝通,對餅干設備不斷改進,更新,使自己的技術緊跟國際先進技術,優秀的產品,合理的價格,成爲國內衆多廠家選擇的對象。 2000年,成立廣東旺通食品有限公司、爲客户提供更好的交流平臺與服務。

In 1978's, General manager Mr.Feng Jian's father guided him to study in Yangjiang stated-own food company for biscuit production and machine maintainance. Mr.Feng grasp all kinds of biscuit manufacturing technics and biscuit lines machine theory after years of working, meanwhile He helped so many friendly factories to maintain andimprove their Lines to work efficiently.

In 1980's, Our factory expanded the sales in Guangdong and Fujian province catching good chance of Chinese innovation, and occupied almost all the above markets so as to make them to be biscuits manufacturing base at that time.

In 1990's, Our factory focus on the matching of biscuit technics and machines. We have been kept updating and improving our machine after deep communication with other factories and customers. Now a days, Our machines catch up with the international standard to gain more and more customers by excellent quality with fair price.

In 2000, Guangdong Wanttone food co.,ltd was set up, which is muchbetter for biscuit business intercommunion.

先爲人 后爲事 Friends first, then business.

不一定爲買設備

It is not always coming for machines purchasing

有空常來旺通走走看看,喝喝茶,聊聊天

Just come to wanttone to look around, tasting tea and chatting

交流工藝,探討市場……

Communicate with technics, Discuss market going

不管老朋友新朋友, 旺通的大門是敞開的

Wanttone is open for old friends and new friends all the time.

坦誠的交流會讓雙方受益

Both parties will get benefit from frankly intercommunion

我們相信:合作的前題是互相了解

We believe in understanding is the basic co-operation

Our Company Slogan 企業經營理念

不斷創新是企業可持續發展的原動力

市場不斷需要新産品

企業永遠在追求高效率

旺通公司憑着

對餅幹工藝的深刻理解

多年餅幹生產與銷售的經驗積累

每時每刻都在研究對設備的改良與提高

我們相信:與時俱進的產品自然受歡迎

Keep innovating leads to constant developing

As markets always demand new items

And enterprises working for better efficient all the way

Wanttone study machines and advance machines with its deep

understanding of biscuit

Technics and experience in manufacturing and selling.

Wanttone believe in updated items never disappoint customers

Winning comes from customers satisfaction 只有客户贏了 我們才算贏

公司有各種項目的專業人員幫助客户設計廠房、生産流程與餅幹配方,爲客户培訓工人、傳授工藝 We have professional workers to design workshop, production process and biscuit technics. We can train your workers and teach details of manufacturing.

向客户提供優秀的供應渠道與公司對餅幹運作的心得體會 We provide our material suppliers and show out our biscuit business running experience

我們能爲客户提供一攬子解决方案 We can service full project as you want

我們的努力至少能讓客户少走彎路 Our efforts can make you avoid wasting time and money

我們相信: 祇有客户運作成功,才能體現我們設備的價值。 We trust our value only under customers succeed.

卧式和面機 Horizontal Dough Mixer

本機采用單速單S漿轉動和面, 攪拌均匀, 操作簡單, 可電動傾倒出料, 適用韌性、酥性餅干的生産。

The machine adopts single speed and single s-wing type to evenly and uniformly stir and mix flour ,which is easy to operate.

It can electricly dump dough and is applicable to soft and hard biscuits.

S槳葉式

S-Wing type

200型卧式和面機主要技術參數:

Type 200 Horizo	mardough	mixer main techi	licai paramet	t
轉速 Speed	總功率 Total power	規格 size	總重量 Total weight	
times/min	kw	mm	kg	
25	12.5	1750×1000×1800	2000	

卧式雙槳和面機 Horizontal Double Wing Dough Mixer

本機采用雙速雙槳葉設計,具有容量大、和面均匀、速度快特點。 適用干韌性、酥性餅干的生產。

The machine adopts dual-speed and double wings with characteristics of large capacity, evening mixing and high speed. It is suitable to produce soft and hard biscuits.

雙S槳葉式 S-Wing type

定時自控

Timing automatism control

荷載 (電流)顯示 Load (electric current)display

控制方式:變頻調速 Control way:frequency and speed adjustable

400型卧式雙槳和面機主要技術參數:

Type 400 Horizontal Double Wing Dough Mixer main technical parameters

轉速 Speed	料桶容量 Bucket capacity	總功率	規格	總重量 Total weight
times/min	kg	kw	mm	kg
18-36	400	48	3000×1450×3000	7560

面團傾倒機 Dough Titling Machine

該設備可將面團車直接傾倒將面團送進成型機,使用該機可提高工作效率, 適用在二層和面時使用。

It can send the dough directly into forming machine to improve work efficiency by tilting dough cart automatically. This machine is applicable to the workshop which forming machine and mixer are not in the same floor.

面團傾倒機主要技術參數:

Dough titling machine main technical parameters

功率 Power	傾倒負載 Tilting load	規格 size	總重量 Total weight
kw	kg	mm	kg
2.2	250~300	1910×860×840	800

卧式叠層機 Horizontal Laminator

本機是我公司最新設計生産的一款新型叠層機,由四臺電機傳動,任意同步調整。具有體積小、運行 穩定、操作簡單的特點。

輸送帶有防偏裝置,不易跑偏。使用該機生産的餅干層次豐富、口感松脆,是生産梳打餅干與提高餅 干質量的必備設備。

This machine is a new type of laminator designed by our company recently , which is driven by 4 motors and synchoronous adjusted at any time ,with characteristics of small volume, stable running and simple manipulation.

It is equipped with a deflection-adjusting device to avoid the conveyor belt easyly off the track. Biscusit produced by this machine taste rich and crisp ,therefore ,it is a necessity for production of sode biscuit and improving biscuit quality.

1000型卧式叠層機主要技術參數:

Type 1000 horizontallaminating machine main technical parameters

叠層寬度 Lamination width	叠層層數 Number of Iaminated layers	壓片厚度 Tablet thickness	總功率 Total power	規格 size	總重量 Total weight
mm		mm	kw	mm	kg
950 – 980	4-12	2.5-8	7.1	3500 × 1300 × 1780	4000

立式叠層機 Vertical Laminator

本機適合二層和面配套使用、是生產梳打餅與提高餅干質量的必備設備。

It is applicable to the workshop which mixer and laminator is not in the same floor and a necessity for production of sode biscuit and improving biscuit quality.

1000型立式叠層機主要技術參數:

ype 1000 vertical laminator main technical parameters					
叠層寬度 _{-amination width}	叠層層數 Number of laminated layers	壓片厚度 Tablet thickness	總功率 Fotal power	規格 size	總重量 Total weight
mm		mm	kw	mm	kg
950 – 980	4-12	2.5-8	8.2	2800 × 2120 × 2550	6000

夾層機 Sandwich Biscuits Machine

與送料機或叠層機配套、分別軋出三組面片、經輸送重叠、能生産三種味道合一體的夾層餅干。

Working together with feeding machine or laminator, it rolls three different dough sheets separately and overlap them during conveying, so that the biscuit enjoys three falvors into one.

夾層機主要技術參數:

Sandwich Biscuits Machine

Jana Wilon B	ioodito maoiiii				
型號 Type	軋輥寬度 Roller Width	壓片厚度 Tablet thickness	總功率 Total power	規格 size	總重量 Total weight
	mm	mm	kw	mm	kg
WT1000	1000	5-25	1.5	1830 × 1500 × 1350	3242
WT1200	1200	5-25	2.2	2030 × 1500 × 1350	3566

軋 面 機 Gauge Roll

本機組是配套滚切機生産韌性餅干的必要設備,通過三座軋片機組能軋制0.5mm的面片,能滿足超薄餅及一般韌性餅的需要。每座機速度可獨立調節,并配有面片厚度數字顯示器。

It is necessity to support rotary cutter to produce hard biscuit.

Which can roll sheet into 5mm minimus, so that it meet needs of ultra-thin biscuit and soda biscuit Each individual machine is speed adjustable independently and equipped with digital display screen to show the thickness of the sheet.

軋面機主要技術參數:

Gauge Roll main technical parameters

型號 Type	總功率 Total power	規格 size	總重量 Total weight
	kw	mm	kg
WT400	1.1,1.1,1.5	1230 × 780 × 1250 (mm)/pcs × 3	950,930,980

WT800	1.5,1.5,4	1630 × 780 × 1250 (mm)/pcs × 3	1325,1300,1380
WT1000	1.5,2.2,5.5	1830 × 780 × 1250 (mm)/pcs × 3	1500,1498,1538
WT1200	1.5,3,7.5	2100 × 780 × 1250 (mm)/pcs × 3	1680,1665,1708

輥 切 機 Rotary Cutter

本機采用雙膠輥雙滚切裝置, 調節方便簡單, 能生產各種韌性餅干, 特別適宜通孔餅干(果醬夾心餅)的成型。

This machine is equipped with double rubble rollers and double rotary cutting device ,which is easy to operate .It is applicable to hard biscuit ,especially to the forming of hole-through biscuits (jam sandwich biscuit).

輥切機主要技術參數:

Rotary cutter main technical parameters

Hotary C	utter mam te	ciiiicai paraii	ieters

卧式輥印機 Horizontal Rotary Moulder

本機采用大直徑印模設計,具有產量高、適應性廣特點,印模、帆布采用獨立動力,速度分别可調節,用于生產酥性餅干。

The horizontal roller stamping machine is of a large-diameter mould design and features high yield and wide applicability. The moulds and the canvas are driven by separate power sources, and their speeds can be adjusted separately. This machine power sources, and their speeds can be adjusted separately. This machine is used to produce crisp biscuits.

卧式輥印機主要技術參數:

Rotary printer main technical

噴油機 Oil Spray Machine

本機采用進口陶瓷噴咀,經高壓霧化噴油,出油均匀。雙油泵裝置,保證生產暢順;多層濾油, 保證不寒噴咀; 噴油量、油温、速度可調節。有回收油霧裝置, 設有自動恒温和濾油裝置。

Equipped with the porcelain nozzlies imported from abroad, this machine ejects oil evenly through high-pressure atomization. Its double oil pump unit can guarantee smooth production, and the multi-layer oil filtration used on the machine makes sure that the nozzles will not be blocked. The machine's quantity of oil ejection, oil temperature, and speed are all adjustable.

Auto recycle for oil and smoking, Auto consistant temperature and oil Filter setting.

噴油機主要技術參數:

WT1200	12	5–25	2000 × 1940 × 2500	900

餅幹整理機 Biscuit Stacking Machine

該機使用恒磁裝置固定分隔苘條,可不停機調節餅道寬度,恒磁裝置能檢吸帶有鐵絲的餅干: 速度可調節,使用該設備能使餅干整理整齊、安全大幅度提高工作效率。

It uses a permanent magnetic device to fix the isolating bars. The biscuit pathes can be adjusted without stopping the machine. The permanent magnetic device can pick up those biscuits containing iron wire. Speed is adjustable. This machine can put the biscuits into order and improve to work efficiently.

餅幹整理機主要技術參數:

biscuit stacking machine main technical parameters

型號 Type	總功率 Total power	速度 Speed	規格 size	總重量 Total weight

WT1200	1.87	5-25	1560 × 1910 × 1150	840

平 彎 機 Powered Bend Units

該設備是充分利用廠房的輔助設備,當生產車間長度不足時,經烘烤后的餅干可做90°或180°的 平面轉彎平過渡輸送。可根據客户要求作不同的配置。

It is a kind of auxiliary machine that is able to make full use of the space of a factory building. When a workshop is not long enough, this machine can convey the baked biscuits with a smooth turn of 90° or 180° in a horizontal plane. Different configurations can be achived according to customers' requirements.

平彎機主要技術參數:

smooth powered bend units technical parameters

餅幹塗蛋機 Biscuit egg coating machine

餅幹塗蛋機主要技術參數:

Biscuit egg coating machine main technical parameters					
功能 Function	輸入功率 Power input	主要配置 Main equipments			
在平整的餅幹表面 塗抹蛋液	kw	0.25kw六極調速電機 1臺(手動調速)	膠輥2根	塗布海綿輥1根	
Coating egg liquid on biscuit surface	0.25	025kw 6-pole speed adjustable(by hand) motor 1 pcs	Rubber roller 2 pcs	Sponge coating roller 1 pcs	

餅幹烘烤爐機 Biscuit Baking Oven

餅幹電熱烤爐

該烤爐由爐體、網帶傳動裝置、排潮系統、電熱管及電控系統組成。電熱控制由半導體元件組成,微電腦控制, 控温准確、可調範圍大、加熱效率高、火色均匀。整爐按工藝需要可分成幾個獨立温區,每個温區可選擇增加熱 風循環。根據客户生產工藝需要設置電熱功率,既節能又能滿足生產需要。

餅幹導熱油烤爐

該烤爐主要由爐體、網帶傳動裝置、排潮系統、爐排(油管)鍋爐(燃煤或燃油)、油泵、閥門等組成。導熱油 從鍋爐加熱后由油泵加壓流至烤爐的爐排內達到加熱的效果,具有温度平穩,控制簡單、節約能源、烘烤的餅干 火色均匀的特點。

鍋爐有兩種耗能形式可選擇,一、燃煤,二、燃油。

Biscuit electro-thermaloven

It is composed of oven body, mesh-belt driving device, moisture-removing sys-tem, electro-thermal tube, and electric control system. Formed with semi-co- nductor components and controlled by a microcomputer, the electric control system features accurate temperature control, larges cope of temperature ad-justment, high heating efficiency, and even heat colors. The oven can be divided into several independent temperature zones according to the tech-nological requi-

rements, and hot air circulation can be used for each of the temperature zones when necessary. The electrothermal power will be set on the basis of the custom-er's productive technology, so not only energy can be conserved but the requirements for production can also be met.

Biscuit heat-conducting oil oven

It is composed of oven bady, mesh-belt driving device, moisture-removing system, grate (oil pipe) oven (coal or oil burning), oil pump, and valves. After being heated in a boiler and pressurized in the oil pump, the heat-conducting oil is sent into the grates of the oven for biscuit heating. This type of machine is characterized by stable temperature, simple control, energy conservation, and even heat colors of the baked biscuits.

There are two ways of energy consumption available for selection: coal burning and oil burning

以生産普通韌性餅幹爲標準的技術指標 (technical parameters based on the standard of common hard biscuit)

直燃式燃氣烤爐

直燃式烤爐可以使用液化氣和天然氣,由爐體、電腦操作系統、電器以及輔助部分組成: 温度控制方 式采用燃燒器開闊式。

特 點:

- 一、烤爐根據烤爐長度和工藝要求分3-5個温區,網帶回程設預熱加温裝置;
- 二、每支燃燒器配一個可調節風量風機、燃氣與空氣按照最佳的燃燒比例在混合器混合后輸入燃燒器、使進入燃燒器的混合氣體爲 固定壓力, 保證充分燃燒, 火苗高度恒定;
- 三、烤爐根據烤爐長度和工藝要求設置固定燃燒值燃燒器、采用開關式調節温度、每個温區上火、下火分别設置三點測温、在每個
- 四、每個温區配有一定比例的三段火燃燒器,可獨立調節燃燒值;
- 五、設點火前爐膛排風安全裝置、燃氣泄露自動報警裝置;
- 六、操作界面設置10.4英寸觸摸屏,具有温度設置、温度顯示、温度曲綫顯示、網帶速度調節、風機速度調節、燃燒器編組、燃燒 器開通、燃燒器閉合、燃燒器故障顯示、20組餅干温度數據儲存等功能;

這種溫度控制方式可以對烤爐的每個溫區進行精密控制,温度在170度與330度之間可以平穩調節,能滿足在一套生產綫上生產 多種工藝產品的需要。

Gas direct-fired oven

Characteristics:

- According to oven length and technics requirement, the oven is divided into 3-5 zones, with wire mesh pre-heating device during returning.
- Every burner is equipped with a volumn adjustable blower, gas and air is transported into burner after mixed in the best buring ratio, so that the mixed gas in the burner with a fixed presure, which ensuring sufficient buring and constant flame height.
- According to oven length and technics requirement, the oven is installed with burner in fixed combustion value and control temperature by swithing regulator ; every zone is divided into upper heat zone and bottom heat zone temperature in both zones is metering on three spots and independantly controlled .
- Burner flame in every zone in divided into three sections in proportion and combustion value can be controlled
- Equipped with chamber air exhausting device to ensure firing security and auto-alarm device of gas leakage.
- O 10.4-inch operator interface with the function of temperature setting ,temperature display ,temperature curve display, wire mesh speed adjusting , blower speed adjusting , organizing burner into group , open burner , close burner , display burner which is in fault ,storing 20group(Max) temperature data and so on .

Advantage:

precisely control temperature in every zone and steadily adjust temperature between 170°C and 330°C, which meet the needs of producing kinds of technics products by one set production line.

1000型黄油曲奇成型機 1000mm Butter Cookie Depositor

雙喂料綫切割系統

Wire Cut System with double dough gear feeder system

操作盤有13個曲奇出料嘴配13副綫割模具

c/w 13pcs cookie nozzle and 13 pcs wire cut mould

曲奇速度: 3-10

Speed for Cookie: 3 to 10 saat/twist

綫隔速度: 1-2

Speed for Wire Cut: 1 to 2 saat/cut

控制系統: 鬆下(日本)PLC, 触摸操作屏, 伺服電動機

Control by Panasonic (Japan) PLC

Touch Screen Panel Control

Panasonic (Japan) Servo motor

馬瑞利 (意大利)電機; Spaggiari 渦輪

Italy Marrelli Motor and Spaggiari worm gear

功率:380瓦,三相

Power: 415 Watt ,three phase

機械尺寸(最小): Minimum Machine Size:

高1800mm (可加高100mm) Height 1800 mm (additional adjustable to 100 mm)

寬2000mm (可加寬500mm) Width 2000 mm (additional adjustable to 500 mm)

長1150mm (固定不可變) Length 1150mm(fix)

曲奇機連接隧道烤爐方案 Scheme of cookie machine with tunnel oven

二合一曲奇成型機 2-in-1 Cookies Depositor

綫割成型機

Wire cutter & Depositor

主機材料爲不銹鋼

Body made in stainless steel

符合衛生的標準

Conform to Hygienic standard

觸摸屏監測器

Touch screen monitor

可儲存及備用30種曲奇餅幹的設計

Include memory and backup up to 30 types of cookies design

型式 Model	SKY-CM 18TS		
電力 Voltage	220V		
	長 Length	1230	
機械規格(mm) Machine size	寛 Width	1020	
	高 Height	1400	
重量 Weight	310KG		
産量 Capacity	60KG	/HR	

直燃式燃氣烤爐

直燃式烤炉可以使用液化气和天然气,由炉体、电脑操作系统、电器以及辅助部分组成;温度控制方式采

特点:

每支燃烧器配一个可调节风量风机,燃气与空气按照最佳的燃烧比例在混合器混合后输入燃烧器,使进入燃烧器的混合气体为固定压 三、力,保证充分燃烧,火苗高度恒定;

四、烤炉根据烤炉长度和工艺要求设置固定燃烧值燃烧器,采用开关式调节温度,每个温区上火、下火分别设置三点测温,在每个温区分三

六、 每个温区配有一定比例的三段火燃烧器,可独立调节燃烧值;

设点火前炉膛排风安全装置、燃气泄露自动报警装置;

操作界面设置10.4英寸触模屏,具有温度设置、温度显示、温度曲线显示、网带速度调节、风机速度调节,燃烧器编组、燃烧器开通、 燃烧器闭合、燃烧器故障显示、20组饼干温度数据储存等功能;

Gas direct-fired oven

Characteristics:

- O According to oven length and technics requirement, the oven is divided into 3-5 zones, with wire mesh pre-heating device during returning.
- O Every burner is equipped with a volumn adjustable blower, gas and air is transported into burner after mixed in the best buring ratio, so that the mixed gas in the burner with a fixed presure, which ensuring sufficient buring and constant flame height.
- O According to oven length and technics requirement ,the oven is installed with burner in fixed combustion value and control temperature by swithing regulator ; every zone is divided into upper heat zone and bottom heat zone ; temperature in both zones is metering on three spots and independantly controlled .
- O Burner flame in every zone in divided into three sections in proportion and combustion value can be controlled
- O Equipped with chamber air exhausting device to ensure firing security and auto-alarm device of gas leakage.
- O 10.4-inch operator interface with the function of temperature setting ,temperature display ,temperature curve display, wire mesh speed adjusting, blower speed adjusting, organizing burner into group, open burner, close burner , display burner which is in fault, storing 20group(Max) temperature data and so on .

Advantage:

precisely control temperature in every zone and steadily adjust temperature between 170°C and 330°C. which meet the needs of producing kinds of technics products by one set production line.
